

Spinal Screening Prospectus

This letter will detail our request on setting up a health information booth to conduct a complimentary postural screening at your location in conjunction with Family Chiropractic, a local Doctor of Chiropractic.

This community service will be conducted in a 12' by 12' space. There will be literature provided for interested individuals with postural-related health problems. The posture analysis is a simple procedure of measuring the individuals posture on a posture meter which is used for the detection of possible spinal misalignments as well as structural defects to determine causes, if any, of possible health problems.

There is absolutely nothing done that involves dangers or risks. There is no charge or obligation to any interested persons for the posture analysis, the literature, or information offered.

This is offered as a public service in order to give individuals an opportunity to have themselves checked for any postural irregularity that they may have. They will also be able to ask questions and receive suggestions on how to improve their posture. The health booth never fails to be popular since people are generally interested in their health.

This is one of many activities that Family Chiropractic coordinates. Our purpose is to professionally educate the public on their health and explore avenues for alternative health care. Family Chiropractic has offered the services of their doctors to help participate in this event.

Our approach is unique. We bring education to the public to make it easy for individuals to find out what can be done to improve their health. This removes a big barrier for the public and they genuinely appreciate this gesture.

If you have any questions or comments, please feel free to contact me at any time at:
(803) 932-9399.

Sincerely,
Dr. R.J. Minico Jr.
